

LAKSHITHA NARANWALA

UX/UI ENGINEER | PRODUCT DESIGNER

+94 76 860 32 05
lakshithaux@gmail.com

I'm focused on creating meaningful experiences through design.

2022 Oct - Present

UX/UI Engineer - Random software Ltd.

I lead end-to-end UX processes including user research, usability testing, wireframing, journey mapping, user flows, and information architecture to shape intuitive and efficient product experiences. I also build scalable design systems, craft seamless interaction patterns, and ensure accessibility standards (WCAG) are met to deliver inclusive, high-quality user interfaces.

2021 Feb - 2022 Oct

UI Engineer - Random software Ltd.

I specialize in crafting visually polished and user-centric interfaces through strong visual design, interaction design, and responsive web design practices. My work includes building high-fidelity prototypes, creating component-based UI systems, and developing consistent design systems and style guides. I also ensure high accessibility standards, thoughtful use of typography and color, and smooth micro-interactions to deliver refined, production-ready UI experiences.

2020 Sep - 2021 Feb

UI Engineer Intern - Random software Ltd.

As a UI/UX Engineer Intern, I supported end-to-end design tasks including user research, wireframing, usability testing, and responsive UI design. I collaborated with senior designers and developers to create intuitive interfaces, build prototypes in Figma, and contribute to improving overall user experience and product consistency.

2019 Jan - Present

Product Designer - Freelance

As a freelance product designer, I worked directly with clients to understand business goals, define user problems, and deliver end-to-end design solutions. I conducted research, created prototypes, designed intuitive interfaces, and collaborated with developers to ship user-centered digital products.

Education

Bsc. In Information Technology
Rajarata University of Sri lanka
2017-2020

Google UX Design
2021

Enterprice Design Thinking
IBM
2020
